

June 2022 Infortel Cloud Release

June 8, 2022

New

Over the past month, we have been working hard at laying the groundwork for our new release. Slated for early Q3, this release includes an interface to Webex Calling. With this release, we provide reports and analytics for this important platform. We are looking for customers interested in being a beta tester for this release. If you are interested, please contact either your Customer Success Manager or sales representative.

Fixed

1. Resolved an issue with Alarms for Microsoft Teams.
2. Resolved an issue with Hunt Group call statistics.
