

## Get call metrics & visibility essential for continual improvement!

If you use Cisco, Webex Calling, Microsoft, Avaya, or another leading on-prem or cloud-based UC platform, *you need* ISI's powerfully smart & easy-to-use solution.

# Reach new levels of employee productivity & better serve constituents

Infortel Select serves up enhanced CDR reporting and analytics so you can see every step of your caller's journey & improve caller satisfaction

### Problem:

Governmental institutions rely on their phone systems for efficient and effective communications with the public. UC and telecom platforms generate call detail that can reveal employee productivity, but they do not give you the analytics to get to the root of the problem.

There's a lot left hidden, leading to inefficiencies and unhappy callers.

### **Solution Overview:**

Go deeper and get better results with Infortel Select's powerful CDR analytics and reporting. Reveal leaders and low performers within workgroups that make or receive calls. Monitor call volumes to ensure you are appropriately staffed. Use untapped call data to see complete call path, and gain "call center" like metrics without the expense and complexity of a full-fledged contact center.

# **Key Infortel Select Benefits**

- Customizable dashboards tailored to each department leader and their team's activity
- Analysis by hour of day for identification of peak traffic times and staffing needs
- Ring time and abandoned call visibility for improved caller experience
- Inbound, outbound, internal, and transferred calls visibility

 Complete cradle-to-grave caller experience level visibility from multiple call segments on a single report for easy investigation into call flow

(Platform-specific feature)

- Inbound caller-ID and integrated reverse number lookup for ad hoc search inquiries
- Ranking and exception reporting to flag leaders and laggards
- Department-level reporting to provide managers with summary stats or call detail on their employees
- Organizationally based security for controlled visibility

Connect with us for a demo today and see how to gain total visibility into your calling activity and add new levels of efficiency and productivity to government agency calling.
